ELANDRA 53 PRESENTED AT SYDNEY INTERNATIONAL BOAT SHOW

GOLD COAST BOAT BUILDER Elandra Yachts presented two Elandra 53 models at the Sydney International Boat Show (July 30-August 3).

"The Elandra 53 is a game-changing boat," says Elandra Yachts Co-founder and Director Luke Durman. "This is a true long-range cruising motor yacht which will equally appeal to the owner who wants to stay aboard for a weekend or a week with friends and cruise the waterways of Sydney Harbour, Pittwater and way beyond."

The 16.1-metre yacht is configured with a three-cabin, two bathroom accommodation plan including a full-beam master suite amidships. Adjacent to the full-beam master is a lavish ensuite.

"We designed and built the Elandra 53 to superyacht quality. The result is superior performance, reliability and extended durability, to which people have responded," says Durman. "We are delighted by the market acceptance of Elandra. It's a great endorsement. We are now well underway with construction on hull number three and are confident of orders from Sydney."

The CZone system controls the entire boat's electrical systems, allowing owners to select operating modes including cruising, dock attended or dock unattended.

Above the large hydraulic-lift swim platform, the garage is designed for a 2.8m Williams Jet Tender with activation by a sophisticated launch and retrieve system.

SUNREEF YACHTS TO DELIVER CATAMARAN DRAGON FLY TO OWNER

SUNREEF YACHTS presents the recently launched 58-foot sailing catamaran *Dragon Fly*, which after a series of sea trials and technical tests left its shipyard and is cruising to Lisbon, Portugal to be delivered to her owners.

The Sunreef 58 boasts innovative features such as renewable energy systems, abundant automation, top notch electronic appliances and well thought out layouts all designed according to the highest comfort standards.

Dragon Fly features a spacious flybridge with helm station, a cockpit, saloon with a galley up, two guest cabins and an exclusive owners' cabin with en-suite bathroom and office area, in two separate hulls. The cockpit houses a storage space and a guest lounge. Located on the flybridge is the main helm station and a seating area.

Interiors combine rosewood, warm burgundy and khaki tones giving a classic feel and uniqueness to the space.
