## POWER 150

This new Sunreef Power 150 is the yard's new flag ship, taking over from preceding models the Sunreef Power 90 and 115. The 150 catamaran sports four decks offering a total area of about 1,000 square metres of liveable space. As every catamaran this one too offers a wide range of advantages namely great stability, shallow draught, low fuel consumption and much more exploitable space than that of mono hulls of the same length. This model features modern lines and styling on deck and inside, her beamy interiors host a large central open space living and dining area from which you access both hulls which can be personalised in terms of layout accordingly as per owners' needs and wishes. The owner's suite is cleverly situated along the upper deck offering a 360° panoramic view.

For open air fans the Power 150 features a bow terrace, a lounge area in the cockpit and a huge 95 square metre fly bridge with a Jacuzzi completing the picture.
