

67' Sunreef Power

The first motor catamaran from Sunreef Yachts

- The first of the new 67 feet long motor catamarans will be launched at the Sunreef Yachts shipyard in Gdansk in autumn 2006
- The exterior was styled by the luxury yacht designer Denn Clifford, in collaboration with the Sunreef constructors and designers who were entrusted with all the engineering and interior design
- The 67' Sunreef Power is the first motor catamaran of this size featuring such a dynamic and aggressive look
- 67' Sunreef Power is meant for demanding owners seeking, comfort, speed, and autonomy:
 - powered by twin 800 HP engines she will reach a maximum speed of 25 knots
 - power by twin 370 HP engines she will attain a fantastic range of 3000 nautical miles while sailing at 8 knots

- The 67' Sunreef Power will be manufactured using the resin-infusion method

- She will be available in three versions: charter, semi-owner, and owner

The 67' Sunreef Power disposes of:

- The giant fly-bridge: over 500 square feet (50m²) of living space with the main helm station
 - the external cockpit of 320 square feet (30m²) of living space
 - the saloon of modern design that creates a harmonious atmosphere with an elegant bar
- The galley and guest cabins within the hulls
- The second helm station located on the mezzanine floor
- The owners' cabin in the forward section of the catamaran (wonderful sea views).
